

What skills will I acquire in Design during KS3 at Stowupland High school?

The advantage of studying Design is that you will develop a very wide range of useful skills – problem solving, generating ideas, being creative and, of course many practical skills as well. It is always a popular course at Stowupland thanks to this wide variety of skills and activities.

What will I study in Design during KS3 at Stowupland High school?

There are three main sections of Design at KS3 – Resistant Materials, Graphic Products and Food. Resistant materials will cover the use of woods, metals and plastics as well as electronics and CAD/CAM. Graphics deals with architecture, packaging, displays and 3D modelling, lettering etc. Food covers nutrition, hygiene and preparation/cooking of meals

How will KS3 Design prepare me for GCSE Design, Food Technology or BTec Engineering and English Literature at Stowupland High School?

The KS3 course will cover the complete design curriculum to fully prepare you with the skills needed to excel at GCSE. You will also complete mini assessed design projects to give you an experience of the GCSE coursework projects.
